

CONTAINER DUMPER ACCESSORIES

All of these features are available for your EVI Container Dumper. Please ask your material handling representative for details.

GATED ENCLOSURE

This fence-like structure will guard the floor space that the dumper needs to perform its operation.

- Available with or without "gate-open" sensor
- Also available with stationary control box
- All welded construction that bolts onto the dumper

AUTO-RUN CONTROL PACKAGE

This package allows the dumper to perform its job with the single push of a button.

- Operator can perform other work while dumper performs its job
- Includes a key switch, emergency stop button, selector switch for automatic or manual mode, and up/down buttons
- A "gate open" sensor is also included with this package

SPRING-LOADED RETAINING BAR

This retaining bar is ideal for processes that use multiple containers of different heights.

- Change the height of the hold down bar quick and easy
- No manual pins to remove and reinstall
- 52" wide bars are in-stock for quick delivery

UPGRADED DRIVE PACKAGE

Cuts lift time in half and your overall cycle time by 25%

- Offers a bigger motor and faster pump
- Rate of descent will not decrease on gravity-down models

FOOT PEDAL CONTROL

Allows for hands-free operation

- This control would replace the standard push buttons
- Excellent for sorting and metering applications
