

DIVERSI-TECH

APPLICATION STUDY

WELDING FUME CONTROL

FRED-JR

THE PROBLEM

This client, located in Iowa, with plants in four other states, wanted to control Weld Fumes while welding on large railroad tank cars during repair activities.

THE SOLUTION

Diversi-Tech shipped a FRED-JR on our *“Try Before You Buy”* program to the client. It should be noted that the customer also tried a competitive unit and realized the advantages of the FRED - like 40% more suction and lower maintenance cost.

THE RESULTS

Following the Demo and good work by the Linde staff, the client ordered fourteen units that were shipped to five different locations.

ALL DIVERSI-TECH MODELS ARE AVAILABLE FOR DEMO TESTING
