

Dry rotary claw vacuum pumps

Operating Principle

- 1 Gas inlet
- 2 Non-return valve
- 3 Claws
- 4 Gas outlet
- 5 Acoustic enclosure

Operating Principle

Inside the pump housing, two claw-shaped rotors take in air as they rotate in opposite directions. The air is compressed by the rotors, then discharged through a silencer to atmosphere.

The non-return valve incorporated into the inlet flange prevents air from back flowing into the vacuum chamber when the pump is turned off.

Mink MM rotary claw vacuum pumps are directly driven by a flanged motor, and the two rotors are synchronized by gears.

A wide range of accessories allow optimum adaptation to many applications.

Accessories

- Inlet filters
- Liquid separators
- Knock-out pots
- High-volume bag filters
- Control valves
- Gauges
- Switches and transmitters
- Motor starters
- Variable speed drives
- Vacuum receivers

Applications

- Food packaging
- Food processing
- Medical
- Laboratory
- Plastics
- Automation
- Packaging
- Electronics
- Pneumatic conveying
- Printing
- Environmental
- Woodworking
- Renewables
- Paper
- Central systems

Technical Data

Pumping Speed vs. Inlet Pressure

Operation duty in dashed area not allowed. Vacuum relief valve to maintain maximum continuous operating pressure included as a standard feature.

MM 1142 BV

Description

The Busch MM series positive displacement vacuum pumps feature a compact rotary claw design that is air-cooled, dry-running and non-contacting.

These features, along with quality construction, result in a pump that offers extremely high reliability and a long service life.

Features

- Non-contacting design, eliminates internal wear and parts to replace
- Air-cooled, requiring no water
- Dry-running, no sealing or lubricating oil is needed in the pumping chamber
- Minimal maintenance
- Economical, reduced power requirements
- High volumetric efficiency

Standard Equipment

- Acoustic enclosure
- Base frame
- Vibration isolators
- TEFC motor
- Oil sight glass
- Inlet screen
- Anti-suck back valve on inlet (except AVH models)
- Vacuum relief valve (models MM 1202 AV, MM 1252 AV, MM 1322 AV, MM 1402 AV only)
- Discharge silencer
- Threaded NPT inlet/outlet connections
