

Top 10 Reasons To Use Genuine Busch Exhaust Filters

1. Proprietary filter media that provides greater oil separating efficiency (99.99%) with minimal oil saturation.
2. Less than 3 parts per million of oil carryover (3mg/m³).
3. Rated for continuous duty temperature to 266 °F or intermittent duty temperature to 302 °F.
4. Reduced sound levels by up to 4 dB(A).
5. High burst pressure with mechanical integrity to 75 PSIG.
6. Special versions for Oxygen and ATEX applications with certification.
7. Constructed with anti-corrosive materials that better withstand water, steam and many chemicals for longer filter service life.
8. Materials are fully conductive between 2 end caps so there is no risk of static electricity build-up.
9. Pre-assembled with Viton o-ring and with orientation mark on back end cap making them easy to install and position.
10. Fully automated manufacturing, assembly, leak, back pressure and conductivity testing for each and every filter, resulting in 100% quality assurance.
