

The Ultimate Vibratory Grizzly

Process Benefits:

- Extend crusher life by reducing wear.
- Increase crusher efficiency.
- Reduce crusher power consumption.
- Rugged single mass technology.
- Low maintenance due to:
 - No exciter springs required.
 - No natural frequency tuning required.
- Easily replaceable grid bars.
- Stepped deck grids enhance screening efficiency.
- Driven by world class electromechanical drives.
- Designed to meet your exact requirements.
- Wide range of achievable capacities*.

Operation:

JVI Vibratory Grizzly Feeders deliver high flow rates and coarse material separation upstream of crushing equipment in heavy industries. Removing undersized particles with a JVI Grizzly greatly increases the efficiency and wear life of crushing equipment.

◆ Grid Arrangements are made to the application.

◆ Hopper Discharge and "Grizzly Only" arrangements are available.

**JVI grizzlies
are rugged
and reliable**

*Available in designs up to 5000 TPH

Also Available – Electromechanical Feeders, Spiral Elevators, Vibratory Screens, Dosing Feeders, & Vibratory Foundry Equipment

JVI Vibratory Equipment ◆ Po Box 40564 ◆ Houston, Texas 77240 ◆ Ph. 832-467-3720 ◆ Fax 832-467-3800
