

VIBRATORY TUBE FEEDER

JVI offers the ultimate electromechanical vibratory tube feeder designed to your application. Vibratory tube feeders have significant advantages over screw feeders. For instance the product never comes in contact with moving parts, thus is not degraded. And maintenance is easier too. Cleaning is achieved easily through removable end inspection covers.

Ideally suited for most products including abrasive, hot and/or friable material, the tube feeder is based on JVI single mass technology. JVI vibratory tube feeders deliver high capacities, repeatable performance and trouble free service.

Options:

- ✓ Electromagnetic Models
- ✓ Replaceable AR liners
- ✓ Stainless Steel / Food grade finishes
- ✓ Overhead or Underneath drive arrangements

Benefits:

- ✓ No internal moving parts
- ✓ Virtually eliminates product degradation
- ✓ Ideal for fragile powders and granules
- ✓ Low maintenance, Easy to clean
