

All JVI Equipment Utilizes:

Aviteq Unbalanced Motors

- Suitable for wash-down
- Available 2, 4, 6, and 8 pole
- Over 100 different 50 & 60 Hz models
- Rated for continuous duty at 100% force output
- Designed exclusively for vibratory equipment applications
- Explosion proof models available

JVI's Single Mass Design Advantages

- Simple rugged designs
- Very low maintenance
- Fewer parts - no exciter springs
- Natural frequency tuning (and retuning) not required
- Much less sensitive to material characteristics
- Suitable for operation with or without material load
- Reliable VSD feed rate adjustability
