

# Vibratory Equipment for the Chemical Industry

# Vibratory Equipment for the Chemical Industry

**Dosing Feeders with optional integrated hoppers**

**Small tube feeders**

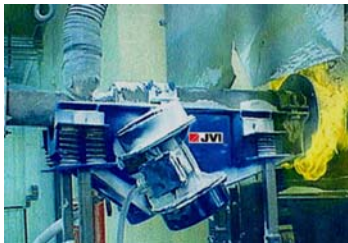

- Chemicals
- Cosmetics
- Powders
- Fertilizers
- Fines
- Pellets
- Friables

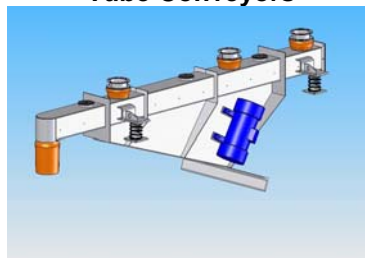

**Spiral Elevators for gentle vertical conveying**

**Feeders for high temperatures**

**Tube Conveyors**

**Electromagnetic or electromechanical vibratory feeders**

Chemical processing equipment must be reliable and accurate as well as adhere to stringent environmental protection regulations. All JVI equipment is engineered to fit the application requirements. Through innovative custom designs, higher standards, and a focus on batching accuracy and long wear life, JVI manufactures vibratory equipment that can help the chemical industry handle dry bulk material more efficiently and productively. JVI offers complete feeder packages, including integrated chutework, designed to the application for feeding, screening, separation, and classification. JVI manufactures world class electromechanical and electromagnetic pan and tube feeders, dosing feeders, spreading feeders, screens, and spiral elevators in their state of the art facility in Houston, Texas.

Call or visit our web site to request a catalog for more detailed information about each type of machine JVI manufactures.
