PHLAUER™ Single Rotor Mixers

- This horizontal single shaft batch mixer is our most popular, as we expected it would be. The price/performance ratio is favorable in many industries. It is very versatile and ideal for adding shear. The majority of mixes do require shear, and it is a benefit to some customers to do no shear mixing and high shear mixing in the same machine at different times.
- PHLAUER™ single rotor mixers mix in ONE MINUTE to Cv. 5% with a unique low speed rotor. It will mix different sizes and weights of particles.
- Very popular for distributing colors in cement & powdered paints. Will save pigments. Guaranteed production rates.
- Predictable, repeatable, and reliable performance.
- Lowest cost per ton.
- High production from a small space. Look at total cost including structure.
- Discharge options are drop bottom, single port, dual port, end discharge. Up to 3 discharges on one machine.
- Sizes available from 1 cu. ft. (30 liters) to 250 cu. ft. (7100 liters)
- Materials of construction: Carbon, Carbon/AR 400 min. Brinell, stainless steel Tp 304, Tp 316, SO17400 HT.

Stainless contact mixer 8 cu. ft. (225 liters) capacity, port discharge, used for powdered paint.

All Stainless Food Grade 26.5 cu. ft. (750 liters) capacity, special end discharge to reduce height, used for sugar based drink.

Carbon Steel with AR400 paddles, 225 cu. ft. (6370 liters) capacity, heavy duty discharge used for animal feed probiotic.
